WORK EXPERIENCE

Nexrage Custom Software Studio

Richardson, TX

Software Developer

Sep 2022 - May 2025

- Implemented transaction monitoring and fraud prevention features for an identity-biometric payments platform. Developed the front end to allow users to customize fraud detection rules and implemented the back-end logic to identify suspicious transactions using external APIs, historical transactions, and request information. Implemented web-hook functionality to notify admins of potential fraud.
- Developed analytics endpoints with queries to aggregate and retrieve project data, providing insights into user activity, bank accounts, events, and transactions. Designed a responsive front-end with charts, graphs, and tables to present data in a visually compelling manner.
- Led the development of a mobile application, designing and implementing the back-end architecture and authentication strategy.
- Built and maintained modern full stack applications for a wide range of clients
- Implemented responsive and performant user-friendly interfaces using React.
- Collaborated with developers to develop scalable software solutions for different needs.
- Designed, developed, and maintained server-side logic, databases, and APIs.
